

Soumya Kanti Naskar

Engineering Delivery Lead | Scrum Master | Senior Full Stack Engineer

Bengaluru, India | +91 87776 98604 | rijunaskar@gmail.com

linkedin.com/in/soumya-kanti-naskar | github.com/Soumya95

PROFESSIONAL SUMMARY

Engineering leader and hands-on full stack developer with 8 years at SAP building and shipping cloud-native, multi-tenant SaaS products used by enterprise customers worldwide. Currently lead delivery for a 36-engineer organisation distributed across India, Vietnam and Germany, owning a platform taken from concept to General Availability, and serve as Scrum Master for the Bengaluru engineering team. Deep experience across the full product lifecycle — architecture, hands-on development in React and Java, performance engineering, release management and cross-functional stakeholder alignment. Early adopter of AI-assisted engineering, having rolled out LLM tooling and internal developer platforms across a product organisation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java 17, Python, HTML5, CSS3, SQL

Frontend: React.js, Redux, Redux-Saga, Node.js, SAPUI5, SAP Fiori Elements, Responsive Web Design

Backend and Data: Java Spring Boot 3.x, REST APIs, OData V4, SAP CAP, SAP HANA Cloud, HDI, Apache Solr

Cloud and Platform: SAP BTP, Cloud Foundry, Multi-tenant (SaaS) architecture, MTXS tenant isolation, MTA build and deployment

AI and Developer Tooling: Generative AI integration, LLM application development, Claude Code, Model Context Protocol (MCP) servers, AI-assisted code review pipelines

DevOps and Quality: CI/CD pipelines, Jenkins, GitHub Actions, Git, SonarQube, static analysis, release engineering

Testing: JUnit 5, Cypress (component and end-to-end), Selenium, QUnit, Chrome DevTools profiling

Leadership: Delivery management, Agile and Scrum, Scrum Master, Scrum of Scrums, sprint and capacity planning, distributed and cross-cultural team leadership, stakeholder management, technical mentoring, Design Thinking

PROFESSIONAL EXPERIENCE

Delivery Lead, Scrum Master (BLR) and Senior Full Stack Developer	Oct 2023 – Present
<i>SAP, Customer Deployment Experience Transformation (CDET)</i>	<i>Bengaluru, India</i>

- Lead end-to-end delivery of **Deployment Hub**, a multi-tenant SaaS platform on SAP BTP that lets enterprise customers configure and personalise their SAP Cloud deployments; drove the product from initial concept through General Availability to global customer rollout.
- Reduced customer customisation effort by **90%** by replacing manual implementation cycles with a self-service personalisation workflow and partner delegation model.
- Serve as **Scrum Master** for the Bengaluru engineering team — run daily stand-ups, sprint planning, retrospectives, and sprint closure and demo sessions on a two-week cadence.
- Manage a **36-engineer distributed organisation** across three sites (India, Vietnam, Germany), driving Scrum of Scrums, daily cross-team design and code-review blocker sessions, functional grooming, capacity forecasting, release management and GA status tracking.
- Architect and build the platform hands-on: React and Redux-Saga front end, Java Spring Boot 3.x services, multi-tenant provisioning on Cloud Foundry, and SAP HANA Cloud HDI persistence.
- Drove **AI-first engineering adoption** across the product organisation — rolled out Claude Code to engineering teams, built internal MCP server tooling for domain-specific workflows, and piloted LLM-powered GitHub Actions in the development pipeline.
- Delivered the **Simplified Implementation** application, an in-product SAP Cloud ALM integration (SAPUI5, CAP OData V4) that streamlined implementation tracking and quality assurance for delivery teams.
- Partner with product management, UX design and engineering leadership across Germany, the United

States and China on product strategy, architecture decisions and roadmap definition; own accessibility, security and performance release gates for General Availability.

Senior Frontend Developer and Scrum Master

May 2019 – Oct 2023

SAP, SAP Fiori Elements

Bengaluru, India

- Developed core capabilities of **SAP Fiori Elements**, a metadata-driven UI framework that thousands of enterprise applications are built on, contributing to the List Report, Object Page and Analytical List Report templates.
- Improved application responsiveness by **30%** through systematic performance profiling with Chrome DevTools and SAP's internal SUPA tooling, then eliminating the rendering and data-fetch bottlenecks identified.
- Contributed to **SAP Fiori Launchpad My Home**, delivering personalised, cross-platform application access for users on desktop and mobile.
- Served as **Scrum Master** for three framework teams — ran ceremonies, backlog refinement, impediment resolution and delivery metrics, while continuing as a hands-on contributor.
- Authored and published a YouTube tutorial series on SAP Fiori Elements, reaching thousands of developers in the SAP ecosystem.

Full Stack Developer (MEAN Stack)

Jul 2018 – Apr 2019

SAP, SAP BUILD

Bengaluru, India

- Built features for SAP BUILD, a web-based UX prototyping and user-research platform, using MongoDB, Express, AngularJS and Node.js.
- Integrated **Apache Solr** to deliver fast full-text search across platform content.
- Shipped PDF export for interactive prototypes, enabling offline design review and stakeholder sign-off.
- Implemented an end-to-end **Selenium** regression suite, increasing release confidence and reducing manual test effort.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

2014 – 2018

Jadavpur University, Kolkata, India

CGPA: 8.60 / 10.0

PUBLICATIONS

- Naskar, S. K. et al. “Robust Identification of Dense or Sparse Crowd Based on Classifier Fusion.” *Springer*, November 2019. [View publication](#)
- Naskar, S. K. et al. “Raga Identification from Hindustani Classical Music Signal Using Compositional Properties.” *Springer*, September 2017. [View publication](#)

RESEARCH AND COMMUNITY

FPGA Cryptographic Hardware Research

Jan 2017 – Jul 2017

Nanyang Technological University (NTU), Singapore

Research Intern

- Designed and implemented an FPGA-based hardware accelerator for the SHA-3 (Keccak) cryptographic hash algorithm, advised by Prof. Anupam Chattopadhyay and Dr. Sourav Sengupta.

Co-Founder, JU Linux User's Group

Feb 2015 – May 2018

Jadavpur University, Kolkata, India

- Founded and ran a technical society promoting Linux and open-source adoption on campus, delivering workshops on shell scripting, web development, cybersecurity and cryptography.

AWARDS AND ACHIEVEMENTS

- **Winner**, ACM Kolkata B.Tech Project Contest, 2018. [Winner list](#) | [Award ceremony](#)
- **Cryptology Research Intern**, R.C. Bose Centre for Cryptology and Security, Indian Statistical Institute (ISI) Kolkata, 2015.
